Community Project Funding Eligible Accounts

Agriculture Subcommittee

Department of Agriculture

Community Facilities Grants
Grants to purchase, construct, or improve essential community facilities, to purchase equipment, and pay other related project expenses. Essential community facilities include, but are not limited to, healthcare facilities, public facilities, public safety measures, educational services, or other community support services. Examples of eligible projects include; medical or dental clinics, towns halls, courthouses, childcare centers, police or fire departments, public works vehicles, or distance learning equipment. Any project must serve a rural area as specified in 7 CFR 3570.53, and the Member’s request must demonstrate community support. Such requests are also subject to the maximum grant assistance limitations specified in 7 CFR 3570.63(b). Community Facilities grants generally cannot be used to pay initial operating expenses or annual recurring expenses, refinance existing debt, pay interest, build or repair facilities in non-rural areas, or pay for construction costs of facilities that will be used for commercial rental space.

ReConnect Program
ReConnect broadband pilot grants facilitate broadband deployment in rural areas. Grant funding can be used for the costs of construction, improvement, or acquisition of facilities and equipment needed to provide broadband service to rural areas without sufficient broadband access, which is defined as 10 Mbps downstream and 1 Mbps upstream. The area must be rural and lack sufficient access to broadband service. A rural area is any area which is not located within: (1) A city, town, or incorporated area that has a population of greater than 20,000 inhabitants; or (2) an urbanized area contiguous and adjacent to a city or town that has a population of greater than 50,000 inhabitants. Sufficient access to broadband is defined as greater than 90% of any rural area in which households have fixed, terrestrial broadband service delivering at least 10 Mbps downstream and 1 Mbps upstream. Mobile and satellite services will not be considered in making the determination of sufficient access to broadband. Stand-alone, middle-mile projects are not eligible under the ReConnect Program. However, middle-mile facilities are eligible if they are needed to bring sufficient broadband service to all premises in the area. It is strongly recommended that Community Project Funding requests include specific information, such as the number of households, businesses, or farms that would be served in the area, what the performance of the service to be offered would be, and whether healthcare or educational facilities would be served.
Agricultural Research Service, Buildings and Facilities
The Agricultural Research Service (ARS) owns and operates laboratories and facilities across the United States. Many of these laboratories/facilities are decades old, have outlived their functional lifespan, and are badly in need of major repairs, renovation, or replacement. Facility requests must be for ARS-owned facilities or for facilities that will enhance ongoing ARS work. Requests can assist in the acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities as necessary to carry out the agricultural research programs of the Department of Agriculture. It is strongly encouraged that Community Project Funding requests include details on the research to be conducted, why the research is a high priority, as well as details on the modernization and why it is critical in carrying out the research.

https://www.ars.usda.gov/about-ars/
Commerce, Justice, and Science Subcommittee

Department of Justice
State and Local Law Enforcement Assistance - Byrne Justice Assistance Grant (JAG)
Byrne JAG Grants assist state, local, and tribal law enforcement efforts to prevent crime, improve the criminal justice system, provide victims’ services, and other related activities. Community projects funded under this category must comply with the requirements cited in JAG statutes and be consistent with U.S. Department of Justice guidance for the program. Below are the links to the Department’s guidance and frequently asked questions regarding Byrne-JAG:

https://bja.ojp.gov/program/jag/overview

The House Appropriations Committee encourages community project funding designed to help improve police-community relations. Historically, the House Appropriations Committee has not funded vehicles or building construction or renovation as part of community project funding under this account.

Community Oriented Policing Services (COPS) - Technology and Equipment
Funding will be provided for community project grants for State, local, and tribal law enforcement to develop and acquire effective technologies and interoperable communications that assist in investigating, responding to, and preventing crime, provided that such equipment meets the applicable requirements of the National Institute of Standards and Technology (NIST)

Office of Law Enforcement Standards (OLES)
This funding will allow recipients the opportunity to establish and enhance any of a variety of technical equipment and/or programs to encourage the continuation and enhancement of community policing efforts within their jurisdictions. These projects should help improve police effectiveness and the flow of information among law enforcement agencies, local government service providers, and the communities they serve. Historically, the Committee has not funded vehicles or building construction or renovation as part of community project funding under this account. Recipients of community project funding under this account may not subgrant to other organizations or agencies.

Department of Commerce

National Oceanic and Atmospheric Administration (NOAA), Operations, Research, and Facilities
Community project funding for NOAA will only be considered within the Operations, Research, and Facilities account. This account does not fund construction projects, and as such, any such requests will not be considered. Requests for funding will be considered for research, demonstration, or education projects performed by external partners or for prioritizing NOAA internal funds for geographically specific projects. Any such project must be aligned with NOAA’s mission and within their existing authorities.
Neither the National Weather Service nor the Office of Marine and Aviation Operations are eligible for Community Project Funding requests.

Coastal Zone Management funds are distributed to states on a formula basis and will not be considered for community project funding.

Historically, the Committee has not funded vehicles or building construction or renovation as part of community project funding under this account.

National Aeronautics and Space Administration (NASA)

NASA Safety, Security, and Mission Services
Funding must be for activities consistent with and supportive of the work of NASA’s mission directorates and within the agency’s authorities, such as STEM education activities and scientific research. Funding for building construction or renovation projects will not be considered for community project funding.
Energy and Water Development Subcommittee

The subcommittee will only be considering requests in the following accounts:

U.S. Army Corps of Engineers
- Investigations
- Construction
- Mississippi River and Tributaries
- Operation and Maintenance

U.S. Bureau of Reclamation
- Water and Related Resources

All requests for the Corps of Engineers (Corps) and the Bureau of Reclamation (Reclamation) accounts listed above should reflect a funding amount that can be realistically utilized in Fiscal Year 2022. It is possible that approved Community Project Funding requests will be funded at a level lower than the requested level. Requestors are encouraged to keep in mind that only a very limited number of new start projects will be considered, if any, in the Investigations, Construction, and Mississippi River and Tributaries accounts. Similarly, requestors are encouraged to keep in mind that only a very limited number of Environmental Infrastructure projects, if any, will be considered in the Construction account. A very limited number of Continuing Authorities Program projects will be considered in the Construction account. Projects authorized under sections 4007, 4009(a), and 4009(c) of the Water Infrastructure Improvements Act for the Nation (WIIN) Act of 2016 (Public Law 114-322) will not be accepted.
Financial Services and General Government Subcommittee

The subcommittee will only be considering requests for the Small Business Initiatives account within the U.S. Small Business Administration. This account provides funds for initiatives related to small business development and entrepreneurship, including programmatic and construction activities.
Homeland Security Subcommittee

Department of Homeland Security

Pre-Disaster Mitigation Projects
Only projects that meet the requirements detailed in the most recent Notice of Funding Opportunity for the Building Resilient Infrastructure and Communities (BRIC) grant program will be considered for funding, including the cost-share requirement and environmental and historic preservation requirements, as applicable. For any projects designated for funding in the final fiscal year 2022 Homeland Security Appropriations Act, the state agency responsible for administering mitigation grants in the requestor’s state must submit an application to the Federal Emergency Management Agency, and that entity will serve as the administrative agent for the grant. Therefore, all project proposals must be accompanied by a letter of support from the appropriate state agency affirming that it believes the project is eligible.

Nonprofit Security Grant Program Projects
Only projects that meet the requirements detailed in the most recent Notice of Funding Opportunity and the Preparedness Grants Manual for the Nonprofit Security Grant Program (NSGP) will be considered for funding. For any projects designated for funding in the final fiscal year 2022 Homeland Security Appropriations Act, the respective state administrative agency (SAA) must submit an application to the Federal Emergency Management Agency, and the SAA will serve as the administrative agent for the grant. Therefore, all project proposals must be accompanied by a letter of support from the appropriate SAA affirming that it believes the project is eligible.

Emergency Operations Center Grant Program
Only projects that meet the requirements detailed in the most recent Notice of Funding Opportunity for the Emergency Operations Center Grant Program, including the cost-share requirement and environmental and historic preservation requirements, as applicable, will be considered for funding. For any projects designated for funding in the final fiscal year 2022 Homeland Security Appropriations Act, the respective state administrative agency (SAA) must submit an application to the Federal Emergency Management Agency, and that agency will serve as the administrative agent for the grant. Therefore, all project proposals must be accompanied by a letter of support from the appropriate SSA affirming that it believes the project is eligible.
Department of the Interior

Land Acquisition through the Land and Water Conservation Fund
Federal acquisition of lands and water and interests therein must be for the purpose of land and habitat conservation and the encouragement of outdoor recreation, as established by the Land and Water Conservation Fund (LWCF) Act of 1965. Land acquisition project requests funded from the LWCF should be requested through the agency that would manage the land being acquired. The four land management agencies are: within the Department of the Interior, (1) the Bureau of Land Management, (2) the Fish and Wildlife Service, (3) the National Park Service; and within the Department of Agriculture, (4) the Forest Service. Third party organizations (i.e. The Nature Conservancy, Trust for Public Land, etc.) frequently participate in the federal acquisition process by coordinating the negotiation and purchase of tracts. If the project you are requesting involves a third-party organization, please be mindful that funding for a land acquisition project goes to the agency that will manage the land.

The Great American Outdoors Act of (Public Law 116-152) and the Consolidated Appropriations Act, 2021 (Public Law 116-260) mandates that the President submit, along with the upcoming fiscal year’s budget request, proposed and supplemental project lists. The Committee will look favorably upon requests for projects that appear in either of these lists. When submitting your request, please indicate whether the project is on these lists.

State and Tribal Assistance Grants (STAG)
The vast majority of requests made to the Interior Subcommittee are for STAG infrastructure grants. These grants fund local wastewater and drinking water infrastructure projects. This includes construction of and modifications to municipal sewage treatment plants and drinking water treatment plants. Similar to past practice, the Committee will be limiting STAG infrastructure grants only to projects that are publicly-owned or owned by a non-profit entity and that are otherwise eligible for the funding from that state’s Clean Water or Drinking Water State Revolving Funds (SRF) loan programs. Privately-owned projects are NOT eligible for infrastructure grants, even if they are otherwise eligible for assistance under a SRF program. The Committee will look favorably upon requests for projects that are listed on a state’s most recent Intended Use Plan.

There is a minimum 20% cost share requirement for any portion of a project funded through a STAG infrastructure grant. For example, a $1 million project could receive a maximum of $800,000 from the Federal government, with the remaining $200,000 the responsibility of the grantee. In almost all cases, other federal funds cannot be used to meet this 20% cost share. Ability to fund the 20% cost share is required before EPA can award a STAG grant. Please note that only the non-federal portion of assistance provided by a SRF can be applied towards a project’s matching requirement.
STAG projects have very specific eligibility requirements, and the Committee will not consider projects that do not meet those requirements.

Projects that generally **ARE NOT** eligible for STAG Grants include:

**Clean Water/Wastewater**
1. Land: except for projects described in the subsequent table under eligibility #11
2. Operations and Maintenance Costs.
3. Non-Municipal point source Control.
4. Acid Rain Drainage Correction.
5. Ambient Water quality monitoring.
6. Flood Control Projects, unless the project is otherwise managing, reducing, treating, or recapturing stormwater.
7. Privately Owned Sewer Pipes.

**Drinking Water**
1. Dams or rehabilitation of dams.
2. Operations and Maintenance Costs.
3. Water Rights, except if the water rights are owned by a system that is being purchased through consolidation as part of a capacity development strategy or if the water rights purchase is covered by EPA’s DWSRF Class Deviation for Water Rights 2019.
4. Reservoirs, except for finished water reservoirs and those reservoirs that are part of the treatment process and are located on the property where the treatment facility is located.
5. Laboratory Fees for Monitoring.
6. Projects needed mainly for fire protection.
7. Projects for systems that lack adequate technical, managerial, and financial capability, unless assistance will ensure compliance.
8. Projects for systems in significant noncompliance, unless funding will ensure compliance.

Projects that generally **ARE** eligible for STAG Grants:

**Clean Water/Wastewater**
1. Wastewater treatment plants, including sludge handling facilities - new, upgraded (increase in treatment level) or expanded (increase in treatment capacity) facilities, including biological facilities, mechanical, a lagoon system, a land treatment system, or individual on-site systems.
2. Collector Sewers - Small sewers that convey wastewater from residences, commercial establishments, and industrial sites to larger interceptor sewers.
3. Interceptor Sewers - Large sewers that convey wastewater from collector sewers directly to a wastewater treatment facility.
4. Sewer Pipes - Rehabilitation is eligible only if pipes are publicly owned.
5. Outfall Sewer - A sewer that conveys treated wastewater from a wastewater treatment facility to the receiving waters (i.e., a river, stream, lake, ocean, etc.).
6. Stormwater Management - Measures to manage, reduce, treat, or recapture stormwater or subsurface drainage water (i.e. storm sewers, green infrastructure, etc.).
7. Combined sewer overflow (CSO) control and sanitary sewer overflow (SSO) control - Combined sewers are sewers that convey both wastewater and storm water and may overflow during periods of heavy rain. The costs to correct CSO and SSO overflow problems are eligible.
8. Infiltration/Inflow Correction - Construction activities that prevent surface water or groundwater from entering the sewer system.
9. Water Security - These projects include installation or upgrade of physical security infrastructure such as lighting, fencing, monitoring and access control. Also, cybersecurity measures, installation of safer treatment technologies, and more secure storage of on-site treatment.
10. Septic Tanks - Remediation, rehabilitation, removal and replacement of failing tanks are eligible, as well as installation of new tanks where none had previously existed.
11. Land - The leasing and fee-simple purchase of land, including surface and subsurface easements, needed to locate eligible municipal or tribal projects, and land integral to the treatment process (e.g., land for effluent application or recharge basins), and a place to store equipment and material during POTW construction. Municipal purchase of land and/or conservation easements for source water protection are also eligible.
12. Water Reuse - Projects involving the municipal reuse or recycling of wastewater, stormwater, or subsurface drainage water. This includes but is not limited to the purchase and installation of treatment equipment sufficient to meet reuse standards, distribution systems to support effluent reuse, recharge transmission lines, injection wells, and equipment to reuse effluent (e.g., gray water, condensate, and wastewater effluent reuse systems).
13. Capital Nonpoint Source Pollution Control Projects – e.g., river or streambank restoration, agricultural best management practices (i.e., buffer strips, manure containment structures), wetlands restoration, etc.

Drinking Water
1. Facilitate compliance with national primary drinking water regulations or address serious risks to public health including non-regulated contaminants (i.e. PFAS).
2. Rehabilitate or develop water sources (excluding reservoirs, dams, dam rehabilitation and water rights) to replace contaminated sources.
3. Install or upgrade treatment facilities.
4. Install or upgrade storage facilities, including finished water reservoirs, to prevent microbiological contaminants from entering the water system.
5. Install or replace transmission and distribution pipes to prevent contamination caused by leaks or breaks in the pipe, or improve water
pressure to safe levels.

6. Projects to consolidate water supplies – for example, when individual homes or other public water supplies have a water supply that is contaminated, or the system is unable to maintain compliance for financial or managerial reasons – are eligible for DWSRF assistance.

7. Land is eligible only if it is integral to a project that is needed to meet or maintain compliance and further public health protection.

8. Project planning, design and other related costs.

**U.S. Forest Service**

**State and Private Forestry**
The Forest Service is an agency within the Department of Agriculture. Requests that do not fit into the described categories below are unlikely to be eligible for funding under the Forest Service.

The State and Private Forestry account provides technical and financial assistance, usually through the network of State Foresters, to improve the management, protection, and utilization of the Nation’s forests. Community projects are usually limited and include various specific urban and community forestry projects and specific forest disease or pest treatment areas. Community Project Funding requests may also include specific State fire assistance projects or specific forestry assistance projects in this account. Inclusion of projects listed on any federal or state ordinal list, or that are clearly demonstrated to meet the goals of a State Forest Act Plan, are encouraged.
**Labor, Health and Human Services, and Education Subcommittee**

The Labor-HHS-Education Subcommittee previously received requests for community project funding to construct or renovate buildings. Health facilities are the *only* types of construction projects normally eligible for community project funding in the Labor-HHS-Education bill.

**Department of Labor**

**Employment and Training Administration**

**Workforce Innovation and Opportunity Act Demonstration Program**

Community project funding is designated under Training and Employment Services. These projects must meet all statutorily mandated requirements, except that they are exempt from the requirement to compete. In addition, all projects must:

1. Include direct services to individuals to enhance employment opportunities;
2. Demonstrate evidence of a linkage with the State or local workforce investment system; and
3. Include an evaluation component.

Equipment purchases may be included within community project funding only as an incidental part of the entire project. A similar standard applies to curriculum development, which should be incidental to the project’s emphasis on direct services to individuals. Community project funding **cannot** be used for construction or renovation of facilities.

**Department of Health and Human Services**

**Health Resources and Services Administration (HRSA)**

Requests that fit into one of the below categories are eligible for Community Project Funding under HRSA: Health Facilities Construction and Equipment, Grants to help with the cost of construction, renovation, or capital equipment for facilities for provision of health, mental health, or substance abuse services, training of health professionals, or medical research. Examples of eligible facilities include hospitals; health centers and clinics; skilled nursing facilities; mental health centers; facilities for schools of medicine, nursing or other health professions; and medical research laboratories.

In addition to construction and renovation, grants can be used to acquire capital equipment, such as lab equipment or x-ray machines. Equipment-only grants—that is, grants not involving construction—are permissible (and commonly done). Generally, any equipment having a useful life of more than one year and a unit cost of at least $5,000 will be eligible as capital equipment. In addition, equipment with lower costs may also be eligible, provided that it is treated as an item of capital expense under the recipient institution’s pre-existing, written accounting policies. Equipment expenses for health information systems and electronic medical records systems are permitted expenditures. The costs of expendable supplies such as pharmaceuticals, lab chemicals, or office paper are not eligible.

HRSA Health Facilities grants cannot be used to acquire land or purchase existing buildings, or to pay salaries or other operating costs. They cannot be used to pay for work previously
completed. Grants can be used for architectural and engineering costs associated with an eligible construction project, but cannot be used for general feasibility studies.

**Health Professions Education and Workforce Development**
Grants for projects to improve education and training of health care professionals, or to analyze health workforce trends and needs.

**Rural Health Outreach**
Grants for projects to improve health care in rural areas. Examples of eligible activities include medical, dental, or mental health care services, health promotion and education, chronic disease management, and improvements to emergency medical services. Grant funds can be used for services only in areas that meet HRSA’s definition of rural.

For lists of eligible areas and further information regarding that definition, see: https://www.hrsa.gov/rural-health/about-us/definition/index.html

**Rural Health Research**
 Grants to support research on rural health problems and ways of improving health care in rural areas.

**Telehealth and Health Information Technology**
Funding for telemedicine, distance learning, or use of information technology to improve health care.

**Substance Abuse and Mental Health Services Administration (SAMHSA)**
Community project funding within SAMHSA should be submitted through the Health Surveillance and Program Support account. Community project funding must fall under one of the following categories:

- **Mental Health:** Grants to support programs that promote the prevention or treatment of mental health disorders, including rehabilitation, outreach, and other support services.

- **Substance Abuse Treatment:** Grants to support programs that improve access, reduce barriers, and promote high quality, effective treatment and recovery services.

- **Substance Abuse Prevention:** Grants to support programs to prevent the onset of illegal drug use, prescription drug misuse and abuse, alcohol misuse and abuse, and underage alcohol and tobacco use.

**Department of Education**

**Elementary and Secondary Education**

**Innovation and Improvement**
Community project funding for elementary and secondary education should be submitted through the Innovation and Improvement account. Elementary and secondary education
community project funding includes instructional services, afterschool centers, curricula development, teacher training, acquisition of books and computers, arts education, social and emotional learning activities, full-service community schools, and early childhood education. In general, the focus of elementary and secondary education community project funding should be providing early childhood or K-12 educational services.

Community project funding to provide and improve special education services at the elementary and secondary levels are also eligible under elementary and secondary education. Community project funding may include early intervention services for infants and toddlers, transition services, and postsecondary education services.

Eligible grantees are state education agencies, school districts, colleges and universities, and other public and private nonprofit entities. Generally, community project funding intended for individual schools is provided to the applicable school district and not directly to the individual school.

Community project funding cannot be used for construction or renovation of school buildings, except in the case of minor remodeling required as part of technology upgrades. Daycare and childcare projects that do not include educational services are also not eligible.

Postsecondary Education

Fund for the Improvement of Postsecondary Education (FIPSE)
Community project funding can be designated under this heading for a wide variety of higher education projects. Generally, community project funding should focus on improving access to, or the quality of, postsecondary education. Community project funding cannot be used for construction or renovation of academic buildings, except in the case of minor remodeling required as part of technology upgrades.

Examples of the types of projects that can be funded under FIPSE include projects to hire and train faculty, establish and improve degree programs, improve teacher preparation programs, develop and improve curricula, upgrade technology and telecommunications, acquire science laboratory equipment, provide student support, implement university partnerships with school districts, and establish research and training centers.

Grantees are usually colleges and universities, but may include other public and private nonprofit organizations.

Limitations on Education-Related Community Project Funding
Except where specifically authorized, community project funding cannot be used for construction (or the acquisition of property) or renovation of buildings. In addition, grantees may not restrict participants based on race, ethnicity or gender. Finally, recipients of community project funding may not sub-grant to other organizations or agencies.
Military Construction, Veterans Affairs Subcommittee

Department of Defense - Military Construction Accounts

Construction and Unspecified Minor Construction– Active Components

Eligible community project requests include both construction and unspecified minor military construction projects for active components. An unspecified minor military construction project is a project that has an approved cost equal to or less than $6,000,000. The types of projects under this heading include construction, installation, equipment of temporary or permanent public works, military installations, and facilities for the accounts listed below:

- Army
- Navy and Marine Corps
- Air Force
- Defense-Wide Agencies (SOCOM, DHA, etc.)

Construction and Unspecified Minor Construction– Reserve Components

Eligible community project requests include both construction and unspecified minor military construction projects for Reserve Components. An unspecified minor military construction project is a project that has an approved cost equal to or less than $6,000,000. Some Reserve Component projects require a State funding match. It must be determined whether the proposed project requires such a match and if so, confirm that the project has current State match funding before the request can be considered. The types of projects under this heading include construction, expansion, rehabilitation, and conversion of facilities for training and administration for the accounts listed below:

- Army National Guard
- Air National Guard
- Army Reserve
- Air Force Reserve
- Navy Reserve

Planning and Design

The types of projects under this heading include improving facility resilience, study, planning, design, and architect and engineer services for the accounts listed below:

- Army
- Navy and Marine Corps
- Air Force
- Defense-Wide Agencies (SOCOM, DHA, etc.)
- Army National Guard
- Air National Guard
- Army Reserve
- Air Force Reserve
- Navy Reserve

Future Year Defense Program (FYDP)

FYDP is a projection of the forces, resources, and programs needed to support Department of Defense (DOD) operations over a five-year span. The FYDP is released simultaneously with the
President’s budget request. The updated document listing projects eligible for FY 2022 will be obtainable after the FY 2022 full budget rollout, through the Under Secretary of Defense (Comptroller) website: https://comptroller.defense.gov/Budget-Materials/

Unfunded Requirements/Unfunded Priorities Lists (UFRs/UPLs)
UFRs/UPLs are lists that each Service provides to Congress that identify priority projects which were not included in the President’s budget request. These lists must be approved by the Secretary of Defense. UFRs/UPLs become available to Congress on the date of the President’s full budget request release, which is different from the release of a top-line budget request or ‘skinny budget’.

Cost-to-Completes (CTCs)
CTCs are projects that have previously received an appropriation but require additional funding for completion. These lists represent the requirements identified by each Service for the additional funding necessary to complete a project. The lists are approved by each Service Secretary.
Transportation, Housing and Urban Development Subcommittee

Department of Transportation

Local Transportation Priorities
Local Transportation Priorities are highway and transit capital projects eligible under title 23 and title 49 of the United States Code. Eligible projects are described under Section 133(b) of title 23, United States Code. Tribal and territorial capital projects authorized under Chapter 2 of title 23, United States Code, are also eligible.
All projects must be:
  ● Capital projects or project-specific planning/design for a capital project.
  ● Supported by the state or local government that would administer the project. Inclusion on a Statewide Transportation Improvement Plan (STIP) or Transportation Improvement Plan (TIP) would satisfy this requirement.
  ● Administered by public entities.
Requests for activities that are administrative in nature will not be funded even if they are eligible expenses under the statutory citation. These include general operating expenses, and activities required under sections 134 and 135 of title 23, United States Code.

Airport Improvement Program (AIP)
AIP community project requests may be used for enhancing airport safety, capacity, and security, and mitigating environmental concerns.
All projects must be:
  ● AIP eligible in accordance with sections 47101 to 47175 of title 49, United States Code, and FAA policy and guidance.
  ● Supported broadly by local stakeholders, including residents, businesses, and elected officials.
  ● Administered by an airport and/or airport sponsor.

Department of Housing and Urban Development

Economic Development Initiative (EDI)
EDI community project requests may be used for economic and community development activities, including land or site acquisition, demolition or rehabilitation of housing or facilities, construction and capital improvements of public facilities (including water and sewer facilities), and public services. Requests may also include planning and other activities consistent with the underlying authorization for the Community Development Block Grant program within HUD.
EDI community project requests are not eligible for the reimbursement of expenses for activities already undertaken (including debt service or debt retirement).
All projects must be:
  ● Supported broadly by local stakeholders, including residents, businesses, and elected officials.
  ● Administered by governmental or non-profit entities, including public housing agencies, as well as tribes and tribally designated housing entities.
